C. Wiefels: Nothing to Disclose

Learners Bill of Rights

The American Society of Nuclear Cardiology recognizes that you are a life-long learner who has chosen to engage in continuing medical education to identify or fill a gap in knowledge, skill, or performance. As part of the American Society of Nuclear Cardiology's duty to you as a learner, you have the right to expect that your continuing medical education experience with the American Society of Nuclear Cardiology includes:

- Content that:
 - promotes improvements or quality in healthcare;
 - is valid, reliable, and accurate;
 - offers balanced presentations that are free of commercial bias for or against a product/service;
 - is vetted through a process that resolves any conflicts of interests of planners, teachers, or authors;
 - is driven and based on learning needs, not commercial interests;
 - addresses the stated objectives or purpose; and
 - is evaluated for its effectiveness in meeting the identified educational need.

- A learning environment that:
 - supports learners' ability to meet their individual needs;
 - respects and attends to any special needs of the learners;
 - respects the diversity of groups of learners; and
 - is free of promotional, commercial, and/or sales activities.

- Disclosure of:
 - Relevant financial relationships planners, teachers, and authors have with commercial interests related to the content of the activity; and
 - commercial support (funding or in-kind resources) of the activity.
